

# ENERGY STAR® QUALIFIED BUILDER

Purchasing an ENERGY STAR® qualified home qualifies you for a \$1,000 rebate through SaskEnergy. All Streetscape Homes qualify for this rebate!

For more information on the rebates available to new home buyers, and on building ENERGY STAR homes, visit these informative websites:

### Sask Energy

### What Makes Streetscape Homes ENERGY STAR® qualified?

Triple Low E Argon Windows

Ultra High Efficiency Furnace (95%)

Air Exchanger (HRV)

Perimeter basement walls insulated to R-20

Electrical run through

Attic insulated to R-50

*New!* Condensing tankless water heater

Digital programmable thermostat

Dual and 4 litre flush toilets

Water saving showerheads

Compact fluorescent light bulbs (CFLs)

Motion sensors in walk-in closets

ENERGY STAR rated air conditioners

fireplaces, and appliances

*...and much more!*

Other energy saving options not currently offered in Streetscape's standard specifications qualify you for additional rebates. These options include installing one or more natural gas appliances, installing a solar domestic hot water heating system, installing a drain-water heat recovery (DWHR) system, and installing a CAN/CSA-488 compliant Geothermal system.

Streetscape Homes was a finalist in the SABEX "Environmental and Sustainability" category for 2010.

Streetscape Homes is the proud recipient of the 2009 Bridges "Environmental Leadership" Award.
